<p>10. Abstract The Environmental Protection Agency (EPA) has administered three rounds of Superfund Reforms throughout the 1990s. EPA's Superfund Reforms impact nearly every aspect of the Superfund program, addressing the areas of enforcement, cleanup, risk assessment, public involvement, environmental justice, economic redevelopment, innovative technology, and State and Tribal empowerment. EPA's Office of Site Remediation Enforcement (OSRE) is interested in obtaining data to evaluate satisfaction with the Superfund De Minimis Settlement Reforms. The purpose of this evaluation is to measure the level of satisfaction that de minimis settlement reform participants have for the reforms (as represented by the de minimis settlement offer) and relate it to whether or not they settled. The proposed evaluation employs a descriptive research design that will yield information about participant satisfaction with the de minimis settlement reform; the relationship between certain policy parameters, e.g., size of the offer, and settlement outcomes; and, the relationship between certain policy parameters and satisfaction with the reforms. Data for the evaluation will be collected by reviewing existing written and electronic EPA files and surveying de minimis responsible parties to obtain primary data.</p>
